ADDITION PLAN INFORMATION

SHEET

7550 Sunwood Drive NW Ramsey, Minnesota 55303 City Hall: 763-427-1410 Building and Inspections: 763-433-9850

Fax: 763-433-9848 www.cityoframsey.com/permits

This pamphlet is a compilation of some of the standard requirements based on the State Building Code and City Zoning Code for projects of this type. This information packet does not contain all of the specific codes for construction and should only be used as a guide. The permittee is responsible to meet all code requirements applicable to each project.

These examples show the detail required for plan submittals to the Inspection Division. From your drawings, plan reviewers should be able to verify the project details.

The following are required when submitting proposals:

- One set of plans, drawn to scale with dimensions.
- A minimum of one elevation, one plan view per floor level and one section view per area being added.
- A survey map showing location of your project. Call or visit the Building and Inspection Division to see if your property has a survey available. (See attached site plan example)
- If septic system/well present indicate location and back-up site.
- Although you do not need to draw plumbing, electrical or heating plans, separate permits are required. The building permit covers only structural, insulation and finish products.
- Owner must be able to show corner monuments of the property or have the site surveyed to the satisfaction of the inspector on the site.
- Call Gopher State One Call prior to any digging to verify utility locations. Call 651-454-0002 48 hours in advance of digging.
- When additions/alterations are done on a home and require access to inside the dwelling, battery operated or hardwired with battery operated backup smoke detectors must be installed throughout the existing dwelling per code. Smoke detectors would be required in each bedroom, in hallway serving bedrooms and on each floor level of the dwelling. These must be installed and operational by final inspection.

A septic system compliance inspection report must be completed and submitted with the building permit application - prior to permit issuance - for any dwelling adding a bedroom to the house. In this case, septic systems which are non-complying must be brought up to code.

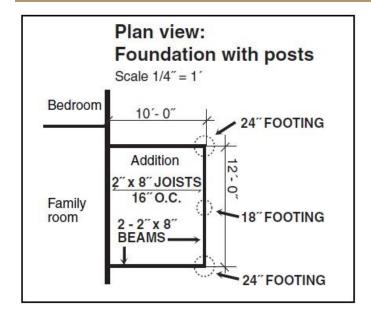

Plan View: Foundation

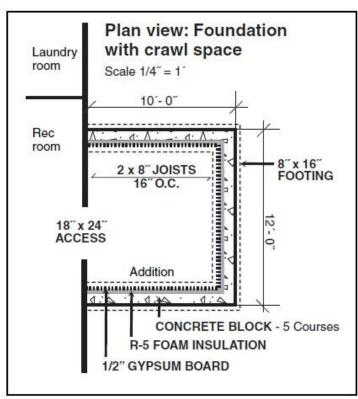

- Locate addition in relation to existing home.
- Indicate whether the addition is a crawl space, full depth foundation or post footings.
- Include written dimensions and locations.

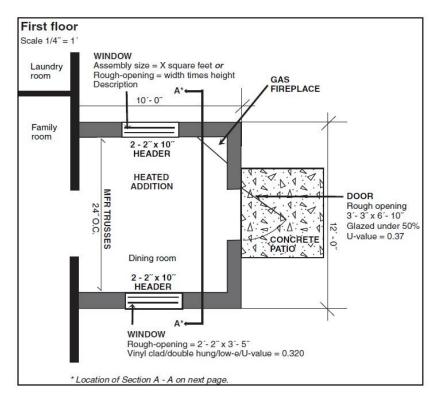

Plan View: Floor

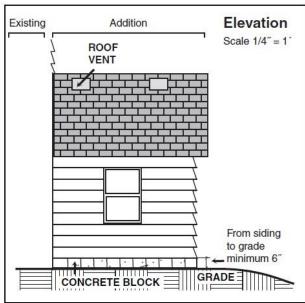

- Include written dimensions on the plan.
- Locate all doors and windows.
- Provide rough opening sizes and U-valves from the manufacturer for each window unit and door.
- Provide header and beam sizes, as well as type of material being used. (e.g. 2 - 2" x 10" Doug Fir or 2 -9-1/2" LVLs.)
- Provide a floor plan for each level being built.
- Indicate direction and spacing rafters/trusses, e.g. 12", 16" or 24" on center.
- Indicate the use (e.g. bathroom, family room, bedroom) of the new room(s) and those adjoining the addition.
- All bathrooms without operable windows must have mechanical exhaust fan provided in the room ducted to the exterior of the building.
- All sleeping rooms must be provided with code complying egress windows and smoke alarms.
- All habitable rooms shall have a minimum ceiling height of not less than 7 feet.

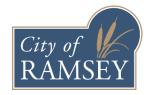

See graphics on next page.

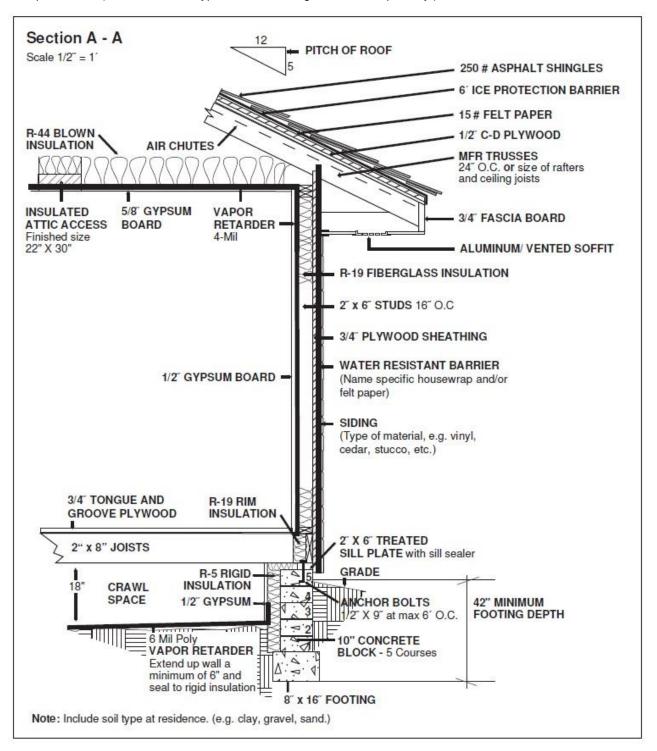

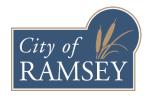

Section View

If more than one area is being built, provide one section view for each area.

See Graphic Below (Note: Materials, type and sizes are given for example only.)

Site Plan

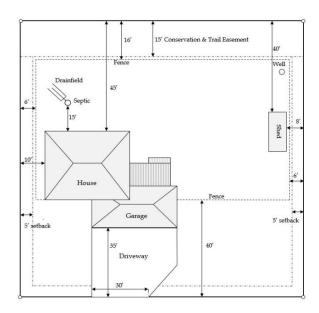

Site plans are required for building permits involving accessory structures, garages, pools, decks, or additions and for all zoning permits.

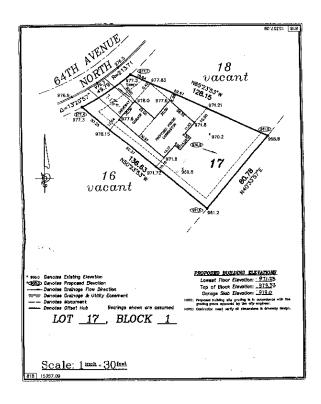

Information to be included:

- 1. Property boundaries
- 2. Principle structures (house/garage)
- 3. Existing driveway(s)
- 4. Proposed location(s) of fence, deck, pool, accessory building, or addition

Information, if present, to be included:

- 1. Existing fences, decks, pools, additions, accessory buildings and/or structures
- 2. Septic & drainfield location
- 3. Well location
- 4. Drainage & utility easements
- 5. Conservation & trail easements
- 6. Any unique physical characteristic of the lot

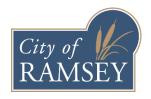

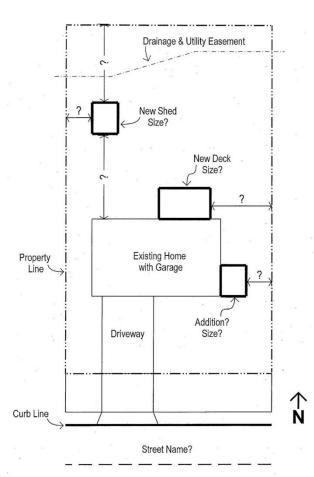

Site Plans may be in the form of an official survey document (most preferred), a scaled computer drawing, or a scaled hand-drawing.

Aerial images are not a preferred means of a site map because most do not include a scale and also due to the loss of information when scanning images into the respective property file. However, aerial images can be used to provide the applicant with an initial site map to trace over for a clear, scanner-friendly site plan.

It is the responsibility of the applicant to provide a site plan with the application showing the proposed modifications to the property.

Example of a computer-drawn site plan with proposed modifications

Example of a hand-drawn site plan with proposed modifications
