This pamphlet is a compilation of some of the standard requirements based on the State Building Code and City Zoning Code for projects of this type. This information packet does not contain all of the specific codes for construction and should only be used as a guide. The permittee is responsible to meet all code requirements applicable to each project.

A building permit is required to finish all residential basements. The basement finish permit issued by the City will also cover plumbing and heating system modifications to existing or roughed-in systems. In all cases a separate electrical permit will be required.

Note: Separate permit and inspections required for electric work.
